

One-to-one Tutoring

Tutors will not proofread or edit your work for you, nor will they contribute to the content of your work. With the exception of those for SPSS a thirty minute period after each computer skills workshop will be set aside for further discussion.

The total number of appointments per student during each semester is limited to four. (Appointments are typically for 30 minutes but may extend to a maximum of one hour).

It is essential to book each tutorial in advance either through the Student Learning city campus reception or by contacting a member of the Research Development staff. Whenever possible attend relevant workshops or consult online resources before making an appointment.

If you are experiencing difficulties with your learning and/or suspect you have a learning disability, book in with one of the specialist tutors from our Learning Disabilities (LD) Programme. You may be eligible for a dyslexia screening or learning assessment.

If you have a documented disability which impacts on your learning (such as Dyslexia, Attention Deficit Disorder or an ongoing mental health condition), you are eligible for one to one tutorials within the Learning Disabilities Programme. Contact SL Reception for more details.

Bookings are essential.

Book at the city campus reception or by contacting tutors.

Email Alerts

To subscribe to weekly email notification about upcoming seminars or workshops go to:

www.cad.auckland.ac.nz/subscribe

Request a Workshop

Staff or students may request a seminar or workshop from within the existing programme for presentation to specific groups of students. Other than those in the computer skills category seminars and workshops will usually be free of charge but significant inputs might incur charges. For further details please contact a member of the research staff or complete the workshop request form on our website www.slc.auckland.ac.nz.

Presentation

PowerPoint for Presentations
Posters via Computers
Composing and Presenting Conference/Seminar Papers
Trial Your Seminar/Conference Paper

Enrolment

Book online to attend Research Support seminars and workshops at www.slc.auckland.ac.nz (click SLC workshops).

Computer Workshop Policy: If you have booked a place at a computer workshop and have not arrived by 5 minutes past the hour, your place will automatically be given to a student on stand-by.

No students are permitted to enter the workshop 10 minutes after start time. If you cannot attend a booked computer workshop please inform Reception at 373 7599 x 88850 or email slc@auckland.ac.nz

Te Fale Pouāwhina

Te Fale Pouāwhina (TFP) is an academic learning skills programme dedicated to supporting Māori and Pasifika students' success. We deliver specialised academic learning skills through workshops, wānanga/fono and individual or group tutoring, taking into account cultural contexts particular to Māori and Pasifika. TFP liaises closely with the University's Tuākana programme and other EO initiatives that provide for Māori and Pasifika students. To find out what TFP is doing for Māori and Pasifika students contact us in person, via phone, email, your Tuākana or visit us on the Student Learning website.

Doctoral Skills Programme

CAD contribute to the School of Graduate Studies Doctoral Skills Programme (DSP). The DSP offers a variety of courses to help students further develop academic and professional skills so that they can complete doctorate programme successfully in a timely manner.

The Doctoral Skills Programme has three major elements: An Induction Day, Core Courses and Additional Courses offered to students in the early, mid and final phase of the doctorate. To register for Doctoral Skills Programme workshops go to www.auckland.ac.nz/doctoralskills.
